EDUCATION

Jacobs School of Engineering | University of California, San Diego

Aug 2025 - Present

Transfer Student | Bachelor of Science in Electrical Engineering

- **Academic Achievements:** Provost Honors
- **Relevant Coursework:** Programming in C, Advanced Digital Design, Circuit Analysis, Circuits and Systems, Components and Circuits Lab, Intro to ECE

Pasadena City College

Aug 2022 - June 2025

- **GPA:** 3.52
- **Academic Achievements:** Completed Honors Program | 2x Dean's Honor

PROJECTS

Autonomous Line Robot

Nov 2025

- Designed and built a line-following robot using Arduino to enable autonomous navigation.
- Implemented a PID control algorithm using potentiometers to enable real-time tuning of PID gains.
- Soldered and integrated photoresistors, LEDs, and motors for line detection and path correction.
- Assembled a 3D printed chassis made with CAD programs such as Onshape to hold all components.
- Achieved 2nd overall based on multiple evaluation events, including a drag race, frequency sweep, and loop course.

Iterated Prisoner's Dilemma Game

Nov 2025

- Developed a program in C that simulates an iterated Prisoner's Dilemma game, modeling strategic decision-making between cooperators and defectors over repeated rounds.
- Implemented multiple strategy types (e.g., always cooperate, always betray, tit-for-tat) and coded the payoff logic and iteration loop for repeated interactions.
- Built logic to track and output accumulated scores and strategy performance over multiple matched runs.
- Analyzed simulation outcomes to compare strategy effectiveness across iterations.

EXTRA-CURRICULAR ACTIVITIES

Math Club, Rosemead High School | Math Tutor

Nov 2020 - June 2022

- Provided one-on-one and small-group tutoring to other high school students in Algebra, Precalculus, Trigonometry, and Calculus.
- Assisted peers in understanding key concepts, solving equations, and preparing for exams.
- Helped 5+ students improve their Algebra grades by at least one letter grade

SKILLS

- **Hardware & Lab Equipment:** Soldering, Breadboarding, Multimeters, Oscilloscopes, Function Generators, Microcontrollers, FPGAs
- **EDA & Simulation Tools:** LTspice, KiCad, Onshape, EDA Playground
- **Hardware Description Languages (HDL):** Verilog, SystemVerilog
- **Programming & Embedded Frameworks:** C, C++, Arduino IDE,
- **Technical Communication:** Schematic Capture, PCB Design Documentation, Lab Technical Reporting
